Notice for TAIYO YUDEN products

Please read this notice before using the TAIYO YUDEN products.

REMINDERS

Product information in this catalog is as of October 2016. All of the contents specified herein are subject to change without notice due to technical improvements, etc. Therefore, please check for the latest information carefully before practical application or use of our products.

Please note that TAIYO YUDEN shall not be in any way responsible for any damages and defects in products or equipment incorporating our products, which are caused under the conditions other than those specified in this catalog or individual specification.

- Please contact TAIYO YUDEN for further details of product specifications as the individual specification is available.
- Please conduct validation and verification of our products in actual condition of mounting and operating environment before using our products.
- The products listed in this catalog are intended for use in general electronic equipment (e.g., AV equipment, OA equipment, home electric appliances, office equipment, information and communication equipment including, without limitation, mobile phone, and PC). Please be sure to contact TAIYO YUDEN for further information before using the products for any equipment which may directly cause loss of human life or bodily injury (e.g., transportation equipment including, without limitation, automotive powertrain control system, train control system, and ship control system, traffic signal equipment, disaster prevention equipment, medical equipment, highly public information network equipment including, without limitation, telephone exchange, and base station).

Please do not incorporate our products into any equipment requiring high levels of safety and/or reliability (e.g., aerospace equipment, aviation equipment, nuclear control equipment, undersea equipment, military equipment).

When our products are used even for high safety and/or reliability-required devices or circuits of general electronic equipment, it is strongly recommended to perform a thorough safety evaluation prior to use of our products and to install a protection circuit as necessary.

Please note that unless you obtain prior written consent of TAIYO YUDEN, TAIYO YUDEN shall not be in any way responsible for any damages incurred by you or third parties arising from use of the products listed in this catalog for any equipment requiring inquiry to TAIYO YUDEN or prohibited for use by TAIYO YUDEN as described above.

- Please note that TAIYO YUDEN shall have no responsibility for any controversies or disputes that may occur in connection with a third party's intellectual property rights and other related rights arising from use of our products. TAIYO YUDEN grants no license for such rights.
- Please note that unless otherwise agreed in writing, the scope of warranty for our products is limited to the delivered our products themselves and TAIYO YUDEN shall not be in any way responsible for any damages resulting from a fault or defect in our products.
- The contents of this catalog are applicable to our products which are purchased from our sales offices or authorized distributors (hereinafter "TAIYO YUDEN's official sales channel"). Please note that the contents of this catalog are not applicable to our products purchased from any seller other than TAIYO YUDEN's official sales channel.
- Caution for Export

Some of our products listed in this catalog may require specific procedures for export according to "U.S. Export Administration Regulations", "Foreign Exchange and Foreign Trade Control Law" of Japan, and other applicable regulations. Should you have any questions on this matter, please contact our sales staff.

Unit:mm(inch)

®Top Tape Strength

The top tape requires a peel-off force of $0.1 \sim 0.7 N$ in the direction of the arrow as illustrated below.

This catalog contains the typical specification only due to the limitation of space. When you consider the purchase of our products, please check our specification. For details of each product (characteristics graph, reliability information, precautions for use, and so on), see our Web site (http://www.ty-top.com/).

CHIP ANTENNAS

■RELIABILITY DATA

Remarks

| 1. Operating Tempe | rature Range | | | |
|---|---|--|--|--|
| Specified Value | -40~+85°C | | | |
| | | | | |
| 2. Storage Tempera | ture Range | | | |
| Specified Value | -40~+85°C | | | |
| Test Methods and Remarks | in the second of the second | | | |
| 2 Saldarahilitu | | | | |
| 3. Solderability | At least 90% of immersed terminal surface is covered by new solder. | | | |
| Specified Value Test Methods and Remarks | Solder temperature : 230±5°C | | | |
| | Duration : 3±1 sec. | | | |
| | Preconditioning : Preheating at 150°C after immersion into flux. | | | |
| | | | | |
| 4. Thermal Shock | | | | |
| Specified Value | Shall satisfy required VSWR value of individual specifications for each item. | | | |
| Test Methods and Remarks | 1 hour of recovery after 10 times of 30min.immersion alternately at -40° C and 85°C of temperature, followed by evaluating electrical characteristics. | | | |
| 5 Uigh Taganayatuw | a Changer Took | | | |
| 5. High Temperature Specified Value | | | | |
| <u>'</u> | Shall satisfy required VSWR value of individual specifications for each item. | | | |
| Test Methods and Remarks | 1 hour of recovery under standard condition after 96 hours recovery with 85°C of temperature, followed by evaluating electrical characteristics. | | | |
| 6. Low Temperature | e Storage Test | | | |
| Specified Value | Shall satisfy required VSWR value of individual specifications for each item. | | | |
| Test Methods and Remarks | 1 hour of recovery under standard condition after 96 hours recovery with -40° C of temperature, followed by evaluating electrical characteristics. | | | |
| 7 Humidity Starage | Test | | | |
| 7. Humidity Storage Specified Value | Shall satisfy required VSWR value of individual specifications for each item. | | | |
| Test Methods and | | | | |
| Remarks | 1 hour of recovery under standard condition after 96 hours recovery with 60°C of temperature, 90~95% relative humidity followed by evaluating electrical characteristics. | | | |
| 8. Resistance to Re | flow | | | |
| Specified Value | Shall satisfy required VSWR value of individual specifications for each item. | | | |
| Test Methods and | Two times of reflow soldering by recommended profile attached, followed by evaluating electrical characteristics. | | | |

Two times of reflow soldering by recommended profile attached, followed by evaluating electrical characteristics.

[▶] This catalog contains the typical specification only due to the limitation of space. When you consider the purchase of our products, please check our specification. For details of each product (characteristics graph, reliability information, precautions for use, and so on), see our Web site (http://www.ty-top.com/).

■PRECAUTIONS

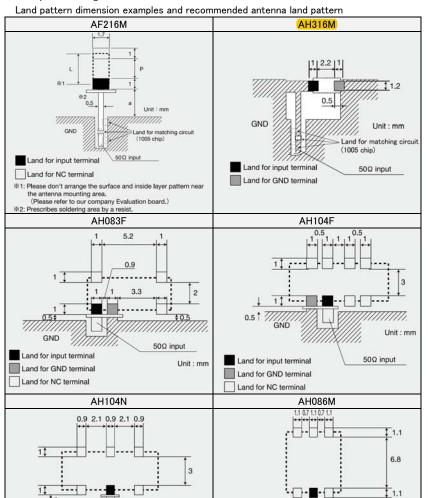

1. PCB Design

Precautions

◆Land pattern design

Please do not arrange the surface and inside layer pattern near the antenna mounting area.

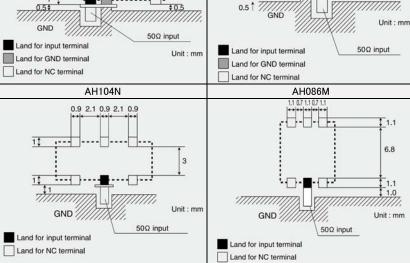

♦Land pattern design

| T | Dimensions | | |
|--------|------------|-----|---|
| Type | L | Р | Α |
| AF216M | 2.5 | 1.5 | 3 |
| AH212M | 2 | 1 | 3 |

Unit:mm

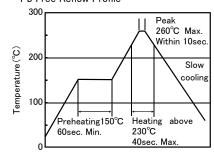

Technical Considerations

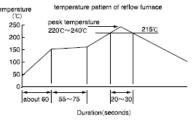

2. Soldering

◆Conditions of Reflow soldering (for reference) Pb Free Reflow Profile

Technical Considerations

· Reflow profile

- ※ Components should be preheated to within 100 to 130°C from soldering temperature.
- X Assured to be reflow soldering for 2 times.

Note: The above profiles are the maximum allowable soldering condition, therefore these profiles are not always recommended.

[▶] This catalog contains the typical specification only due to the limitation of space. When you consider the purchase of our products, please check our specification. For details of each product (characteristics graph, reliability information, precautions for use, and so on), see our Web site (http://www.ty-top.com/) .

3. Storage Conditions

- ◆Storage conditions
- 1. The Products should not be used in the following environments :
 - exposure to special gases such as (C12, NH3, SOx, NOx)
 - exposure to volatile gas or inflammable gas
 - exposure to a lot of dust
- Precautions exposu
 - · exposure to water or condensation
 - · exposure to direct sunlight or freezing
 - 2. The Products should be kept in the following conditions :
 - Temperature : −10~+40°C
 - Humidity: 70%RH max.
 - 3. The products should be used within 6 months after delivery. In case of storage over 6 months, solderability shall be checked before actual usage.
- Please contact our offices for further details of specifications.

All of the standard values listed here are subject to change without notice due to technical improvements.

Therefore, please check the specifications carefully before use.

This catalog contains the typical specification only due to the limitation of space. When you consider the purchase of our products, please check our specification. For details of each product (characteristics graph, reliability information, precautions for use, and so on), see our Web site (http://www.ty-top.com/).
